BIOGRAPHY

DON’T CRY is a DJ and music producer driven by a deep passion for underground electronic music — and the music director of No More Silence™, shaping the sound of every lineup the collective puts on. Since starting the project in 2025 he has moved between hard techno, schranz, hard bounce and trance, combining powerful rhythms, hypnotic grooves and dark atmospheres with emotional melodies that cut through the pressure.

Years spent exploring different sounds and genres give his productions and DJ sets a wide perspective, but the goal never changes: energy, emotion and a direct connection with the dancefloor. His single “Oblivion” was released on No More Silence in June 2026.

He has played IN VERRUF at ROXY Istanbul, the Birthday Bash and Seven Deadly at Temple, and the 74HALL night with THAM, where his back-to-back with SIN9 became one of the crew’s signature moments. Always evolving, always experimenting, always searching for new ways to express himself through sound.
